DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to an isolated nucleic acid molecule, classified in class 536, subclass 23.1.
- II. Claim 2, drawn to an isolated nucleic acid molecule, classified in class 536, subclass 23.1.
- III. Claim 3, drawn to an isolated nucleic acid molecule, classified in class 536, subclass 23.1.
- IV. Claim 4, drawn to an isolated nucleic acid molecule, classified in class 536, subclass 23.1.
- V. Claim 5, drawn to an isolated nucleic acid molecule, classified in class 536, subclass 23.1.
- VI. Claim 6, drawn to an isolated nucleic acid molecule, classified in class 536, subclass 23.1.

The inventions are distinct, each from the other because of the following reasons:

Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. Protein sequences are also structurally distinct

Art Unit: 1654

compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide and protein sequence are presumed to represent an independent and distinct invention, subject to restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141.

Should applicant traverse on the ground that the sequences are not patentably distinct, applicant should submit or identify such evidence now of record showing the sequences to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the prior invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirements be traversed. See 37 CFR 1.143.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is (703)305-4243. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can be reached on (703) 306-3220. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306
